

SURGICAL INFORMATION FORM

Dear Client,

Your pet has been scheduled for an upcoming surgery in the near future. In our attempt to assist clients, we have put together this packet to make surgery day as easy and stress-free as possible.

In addition to this letter, you will find that the following information has been enclosed:

Pre-Anesthetic Blood Testing Information Form (**Bring in Day of Surgery**)

Please read carefully all the enclosed information. If you have any questions, please feel free to call us. On your pet's surgery day, we require you to review and sign an **Authorization Form**— which allows you to choose optional services.

We require a phone number(s) where you can be reached surgery day.

The night before your pet's surgery...

- **Withhold all food and treats after midnight.**
- **Water may be left down after this time period.**

Please make arrangements for your pet to be dropped off on the morning of scheduled surgery, unless other arrangements have been made in advance. At time of drop off, our team will be happy to answer any questions/concerns and provide you with an **Authorization Form to be signed**.

If any questions arise, the doctor may contact you at the number on the Authorization Form.

You are welcome to check up on your pet's status, however, we request that you allow plenty of time for your pet's procedure to be done. At this time, we will be able to give you an idea when your pet may be discharged. When you arrive to take your pet home, the receptionist will bill you out and the veterinary nurse will go over all discharge orders. If you do not understand any instructions, please do not hesitate to ask them to go over them one more time.

We hope surgery day will be a pleasant experience. Remember, our team knows surgery can be an anxious time and we are always available to answer any and all questions concerning the upcoming procedure.

We look forward to serving you and your pet on the upcoming surgery day and years to come.

PRE-ANESTHETIC BLOOD TESTING INFORMATION FORM

PLEASE READ CAREFULLY.

Our greatest concern is the well being of your pet. Before putting your pet under anesthesia, we routinely perform a full physical examination.

We also highly recommend and sometimes require that a **Pre-Anesthetic Blood Profile** be performed on all pets' undergoing anesthesia to maximize patient safety.

The **Pre-Anesthetic Blood Profile** helps alert our surgeon to the presence of dehydration, anemia, infection, diabetes and/or kidney or liver disease that could complicate the procedure. These conditions may not be detected **without** a pre-anesthetic profile thus not allowing for the most appropriate and safest anesthetic regime to be administered. These tests are similar to those your own physician would run if you were to undergo anesthesia. In addition, these tests may be useful if your pet's health changes to develop faster, more accurate diagnoses and treatments.

**State of the art equipment enables us to perform the pre-anesthetic blood profile at our hospital and we are committed to making this technology available to our patients.*

The **Authorization Form** you will sign on your pet's surgery date will offer pre-anesthetic blood work.

1. **The Quantitative Blood Count (QBC) and Pre-Anesthetic Profile** which includes:

- **CBC:** PCV (Anemia), White Blood Cell Count (Infection) & Red Blood Cell Count (Anemia/Bleeding Disorder), Platelet Count (Clotting Disorder)
- **Profile:** BUN and Creatinine (Kidney), ALKP and ALT (Liver), Glucose (Sugar), Total Protein (Dehydration), and Electrolytes (Imbalance).

2. **Owner Elects to Decline** the recommended pre-anesthetic blood tests at this time but requests that we proceed with the procedure. This is indicated by **NOT** checking the optional procedures.

You will notice other tests available that are not included in the above choices. We have selected tests that give the doctors a suitable overview of healthy patients. However, if the patients are in their senior years (above 7 years old) or are sick, the FULL senior profile can be done the day of the procedure at the owner's request.

On the **Feline Patient Authorization Form**, our feline owners will see a **FelLV/FIV Test** option. We highly recommend this test be performed on all feline patients at least once in their lives because Feline Leukemia and Feline Immunodeficiency Virus (Feline Aids) are viruses for which no cure exists. If your pet goes outside, we recommend administering the Feline Leukemia vaccine as well. Please ask questions if you would like to learn more about Feline Leukemia and Feline Aids.

We realize surgery and anesthesia are scary for both the owner and patient and we attempt to make surgery day as safe and comfortable for all involved. The physical examination and blood work done prior to any surgical procedure allows us to best minimize anesthetic and surgical risks and maximize patient safety.

If you have any questions or hesitations about the scheduled procedure, please do not hesitate to call us to discuss any aspect of the upcoming procedure.
